Product information, including uses/applications and source(s) of imports:

The synthetic organic chemical, 3,3-bis(2-methyl-1-octyl-1*H*-indol-3-yl)-1(3*H*)-isobenzofuranone, is used in the manufacture of specialty coated paper products to allow for the desired printed or written character or image to be imparted or generated on the finished paper/paperboard product. Ciba Specialty Chemicals imports the subject chemical from its affiliated plant in the United Kingdom. This chemical is also available from China, although there is no known U.S. production of this chemical or a like competing product.

Technical comments:³

The Commission suggests that the article description as presented on page 1 of this report be used in the proposed new heading in order to provide correct italicization of uppercase “H”s used in the chemical name.

³ The Commission may express an opinion on the HTS classification of a product to facilitate consideration of the bill. However, by law, only the U.S. Customs Service is authorized to issue a binding ruling on this matter. The Commission believes that the U.S. Customs Service should be consulted prior to enactment of the bill.
